SUMMARY

Software Developer specializing in Artificial Intelligence and Machine Learning with experience building scalable web applications integrated with intelligent systems. Skilled in React.js, Next.js, Python, and Express.js with strong experience in API integration, responsive design, and modern UI development. Passionate about developing AI-powered digital products and data-driven applications that enhance user experience and performance.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C++, C#, SQL
- **Frontend Development:** React.js, Next.js, HTML, CSS, Tailwind CSS, Responsive Design
- **Backend / Frameworks:** Express.js, REST APIs, .NET
- **AI / Data Libraries:** NumPy, Pandas
- **Developer Tools:** Git, GitHub, Figma, n8n, Microsoft Power Apps
- **Design Tools:** Adobe Premiere Pro, Adobe Illustrator

EDUCATION

- **Bennett University** Greater Noida, India
B.Tech in Computer Science Engineering (AI & ML) — CGPA: 8.36 2023 – Present
- **Delhi Public School, Ruby Park** Kolkata, India
Class XII — Percentage: 77.8% 2022
- **Delhi Public School, Ruby Park** Kolkata, India
Class X — Percentage: 94.6% 2020

PROJECTS

- **Re:Write** *Next.js, Tailwind CSS, Gemini API, Clerk, Supabase*
 - An AI web app that turns long-form content (blogs, scripts) into short social media posts (Instagram, X, LinkedIn).
 - Built with Next.js, Tailwind CSS, and powered by the Google GenAI API for content generation.
 - Secured with Clerk for authentication and connected to Supabase for data management.
- **The Movie Project** *React.js, Tailwind CSS, Appwrite*
 - Built a movie discovery web application that allows users to search and explore trending films.
 - Integrated third-party APIs to retrieve real-time movie data and dynamically update UI components.
 - Improved application performance by optimizing API requests and frontend rendering.
- **HR Policy Assistant** *React.js, Python, FastAPI, LangChain, ChromaDB, Supabase*
 - Built a Retrieval-Augmented Generation (RAG) system for answering HR policy queries using semantic search over enterprise documents.
 - Developed secure admin workflows for document upload, indexing, and authentication with role-based access control.
 - Optimized document chunking, embedding generation, and vector search to deliver fast, accurate, citation-backed responses.

ACHIEVEMENTS

- **Runner-Up**, Gen AI Hackathon – Rishihood University (2025) among 50+ teams for building a generative AI-powered content automation platform.
- **Shortlisted Team**, Designathon – Manipal University Jaipur (2026) for UX research, wireframing, and prototype design.
- Participant, Hackaccino Hackathon – Bennett University (2024) developing a digital hub for student engagement in college festivals.

LANGUAGES

English, Hindi, Bengali
